WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a 760 x 600 mm rectangle from 3 mm mild steel plate.

Grind the edges and round the four corners to about 10 mm.

No holes. Mark a 572 mm circle in the middle with a centre line each way: the drum stands on this circle.

Fit: lies flat on the four blocks (580 mm square). The pan is wider than the blocks by 90 mm each side, so embers from the ports land on steel, not soil.

Check: rests flat on the blocks without rocking.

CharCube ash pan: making sketch
